

# Explainable AI (XAI) & Its Importance

Challenges, Validation Metrics, and Industry Solutions

Lijing Cui  
Jun 14 2026

# Challenges in Explainability

- Deep learning models are highly complex
- • Black-box decision making
- • Tradeoff between accuracy and interpretability
- • Regulatory and legal requirements

# Validation & Performance Metrics

- Accuracy, Precision, Recall, F1-Score
- • ROC-AUC and Calibration
- • Robustness and Reliability Testing
- • Explainability quality measures

# Current Solutions & Techniques

- SHAP (feature importance)
- ● LIME (local explanations)
- ● Decision Trees & Rule-Based Models
- ● Model Cards and AI Governance Frameworks

# Industry Adoption & Future Trends

- Healthcare diagnostic transparency
- • Financial risk assessment
- • Responsible Generative AI
- • Emerging AI regulations worldwide
